

Scanner option settings: (File Name/Type) – Ability to scan pictures

The following options are available under the “File Name/Type” virtual button under the “Scanner” display panel. Please note that the only default setting is: “Multi-Page: PDF”.

Single Page:

Select TIFF/JPEG if you need to scan a single sheet which is a photo or other picture type item you want to receive as an attachment e-mail so you can easily incorporate the image into a Word document or other application

Multi-Page:

Select “TIFF” file extension button if you have more than one page of images that you would like to receive as an attachment to your scanned e-mail message.
