

# THIRD INTERNATIONAL CONGRESS ON CRITICAL PERSPECTIVES ON ENERGY, ENVIRONMENT, TECHNOLOGY AND WATER DEVELOPMENT, AND PROTECTION WORLDWIDE

April 1-2, 2010

## THEMES & TOPICS

SPONSORED BY:

CLARION UNIVERSITY OF PENNSYLVANIA

- Sustainability Theory and Practice
- Sustainable Development in Africa
- Sustainable Development in North America
- Sustainable Development in South America
- Sustainable Development in Europe
- Sustainable Development in Asia
- Sustainable Development in Australia
- Environmental Regimes in World Regions
- Sustainable Water Resources Management
- Environmental Education
- Gender Responses to Sustainable Development
- Forest Resources and Sustainable Development
- Local and Regional Implementation of Sustainable Development Strategies
- Tourism and Sustainable Development
- Environmental Pollution and Sustainable Development
- Exhaustible Resources and Sustainable Development
- Extraction of Natural Resources
- Renewable Resources and Sustainable Development
- Conservation and Preservation
- Urbanization
- Wetlands and Sustainable Development
- Environmental Policies and Development
- Land Tenure and Sustainable Development
- Manufacturing Sector and Sustainable Development
- Technology Transfer
- Stakeholders, Environmental Protection and Sustainability
- Bio-Diversity Protection and Conservation
- Ground Water Pollution and Technology
- Soil Erosion
- Air Pollution
- Conventions and their Implications for the Protection of Natural Resources
- Global Institutions and Environmental Protection – UNESCO, UNEP, USAID, World Bank, etc.
- Energy Production and Implications for the Environment
- State, Local, National, and International Environmental Efforts (Case Studies)
- Global Warming, Co2 production and Climate Change
- Ecological Economics
- Implementing Sustainable Development
- Institutional Change for Environmental Protection and Sustainable growth and Development
- The Role of the State and Individuals in Sustainable Land Development
- The Role of Industry, Corporation, and Firms in Environmental Strategy for the Protection of Ecological Systems
- Social Sciences and Sustainability
- The Role of Universities in Sustainable Development
- Water Pollution and Control
- Technologies for Environmental Protection
- The Protection of Wildlife
- The Protection of Vegetation (Plant Cover)
- The World Lakes and their Demise (e.g. Lake Chad)
- Desertification and Deforestation
- Environmental Sociology
- Conceptual Issues of Environmental Pollution and Management
- Transportation and Transformation
- Landscapes and their Changing Form
- Impacts of Land Uses on Ecosystem: Commercial, Industrial, Residential, and Agricultural Land Uses
- How to Design Physical Structures with Nature in Mind
