Using EBSCOhost at Clarion University of Pennsylvania

---

---

# EBSCOhost

- The EBSCOhost platform provides access to a broad spectrum of databases, which index and abstract academic journal literature. Many of the databases available through EBSCOhost are “partially full-text,” meaning that many of the articles described in the database are also instantly available online.
  - Academic Search Complete, the most commonly used EBSCOhost database, is multi-disciplinary (meaning that it covers information in a wide variety of majors and fields of knowledge.)
-

---

# EBSCOhost

- The EBSCOhost service offers many individual databases available for searching by Clarion University students and employees:
    - Academic Search Complete
    - Agricola
    - Alt HealthWatch
    - Art Abstracts
    - Biological Abstracts (BIOSIS)
    - Business Source Premier
    - CINAHL with Full Text

# EBSCOhost

To access EBSCOhost via the Clarion University Libraries:

- point your browser to <http://www.clarion.edu> and select **Library**.

- Select “A-Z Database List” from the **Research Resources** category.

- Select the EBSCO database of your choice.

---

# EBSCOhost

- ❑ When accessing an EBSCOhost database from off-campus, you will be prompted for a library ID Login. Access is only valid for Clarion University students, staff, and faculty.
  - ❑ Students: Your Library ID Login is 9 + your Clarion ID number. For example, if your Clarion ID is “12345678”, your Library ID Login will be “912345678”. If you don’t know your Clarion ID, you will be able to find it by following the instructions at [www.clarion.edu/40242/](http://www.clarion.edu/40242/)
  - ❑ Faculty and Staff: Your Library ID Login is a nine-digit number consisting of a series of leading zeroes followed by your employee ID number. Use enough preceding zeroes to create a nine-digit number. For example, if your employee number is 98765, your Library ID Login is 000098765. Your employee ID number can be found on your current pay stub.
  - ❑ In addition to a prompt for the Library ID number, you also have the option to log in using your Clarion username (without the “@clarion.edu”) and password.

*Academic Search Complete* is the world's most valuable and comprehensive scholarly, multi-disciplinary full-text database, with more than 7,100 full-text periodicals, including more than 6,100 peer-reviewed journals. In addition to full text, this database offers indexing and abstracts for more than 11,200 journals and a total of more than 11,700 publications including monographs, reports, conference proceedings, etc. The database features PDF content going back as far as 1887, with the majority of full text titles in native (searchable) PDF format. Searchable cited references are provided for more than 1,300 journals.

[Title List](#) [More Information](#) [Agricola](#)

This database contains bibliographic records from the U.S. Department of Agriculture's National Agricultural Library. Coverage for *AGRICOLA* dates back to 1970 and includes more than 4.6 million citations. The citations are comprised of journal articles, monographs, theses, patents, software, audiovisual materials, and technical reports related to agriculture.

[More Information](#) [Alt HealthWatch](#)

This database focuses on the many perspectives of complementary, holistic and integrated approaches to health care and wellness. It offers libraries full text articles for more than 180 international, and often peer-reviewed journals and reports. In addition, there are hundreds of pamphlets, booklets, special reports, original research and book excerpts. *Alt HealthWatch* provides in-depth coverage across the full spectrum of subject areas covered by complementary and alternative medicine. This database features indexing and abstracts going back as far as 1984, and full text going back as far as 1990

[Title List](#) [More Information](#) [Art Abstracts](#)

*Art Abstracts*, produced by the H.W. Wilson Company, provides comprehensive indexing and abstracts for more than 450 international art publications, including periodicals, yearbooks, and museum bulletins. Indexing spans from 1984 to the present.

[More Information](#) [Biological Abstracts](#)

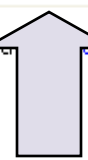

*Biological Abstracts* is a complete collection of bibliographic references covering life science and biomedical research literature published from more than 4,000 journals internationally.

Following each search box is an option to limit your search terms to a particular field. The default setting is *Select a Field (optional)*, meaning that your designated terms could appear in any field within the record.

However, if you desire, you could choose to limit your search terms only to the *title* field, the *subject terms* field, the *author* field, etc. For the broadest possible search, leave this on the default setting of *Select a Field*.

# AND Narrows Your Search

When running a search on *school choice and Canada*, the database will first look for all records mentioning school choice. It will then look for all of the records mentioning Canada. Finally, you will be presented **ONLY** with the items that mention **both** school choice and Canada. The AND operator allows you to refine and limit your search.

# OR Broadens Your Search

school choice

OR

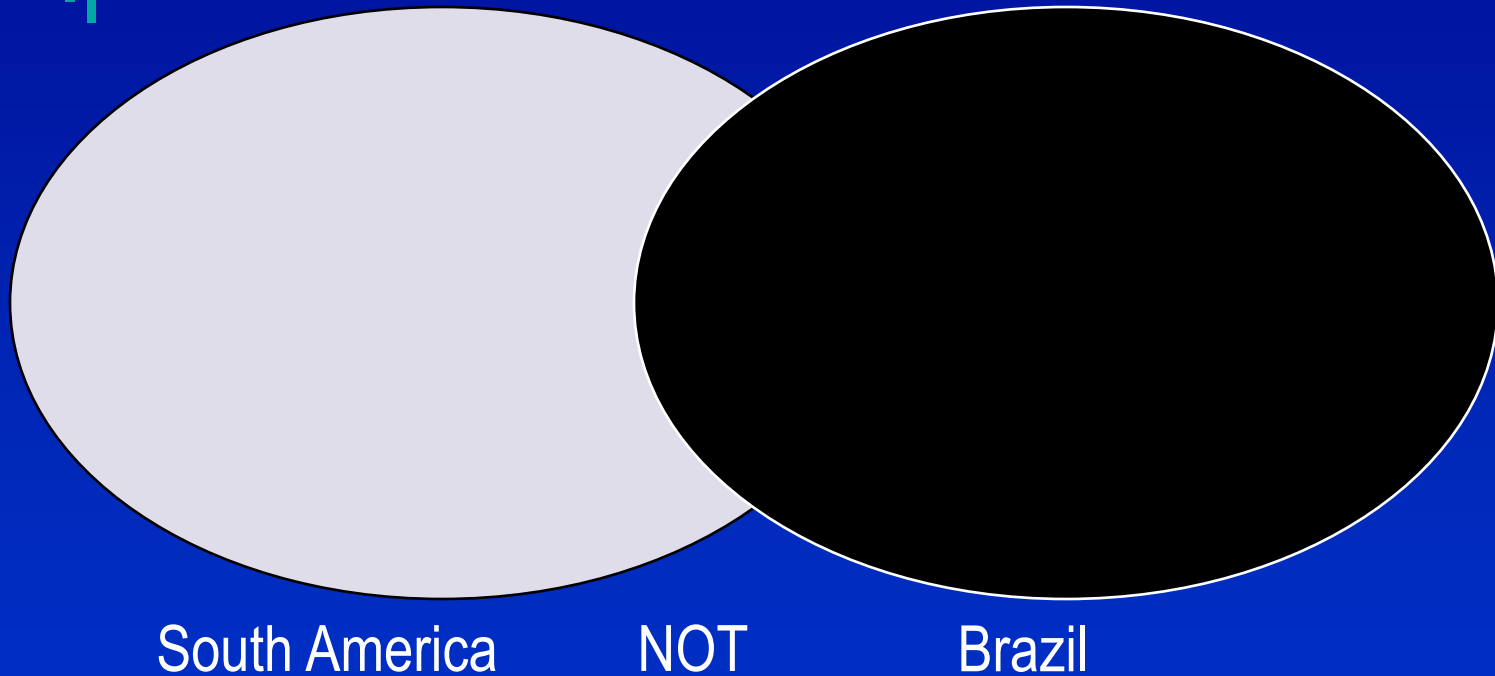

vouchers

When running a search on *school choice* or *vouchers*, the database will look for all records mentioning school choice, all of the records mentioning vouchers, and will present you with all of the resulting records. The resulting records will mention at least one of the two terms that you entered. The OR operator allows you to broaden and expand your search. For this reason, it is good to use with synonyms or related terms, so that you are accessing the broadest amount of information possible for your topic.

---

# NOT Excludes Elements From Your Search

When running a search on *South America NOT Brazil*, the database will look for all records mentioning *South America*, but will exclude any items that also mention *Brazil*. The NOT operator allows you to exclude an idea or term from your search. This operator is used far less commonly than AND and OR.
